

# Ball Python Tank Set-Up Guide

## GLASS TANK SHOPPING LIST

- Dome for heat bulb
- Ceramic Heat Emitter (CHE) bulb
- Thermostat for heat source
- Digital Thermometer/Hygrometer
- Cage clips
- HVAC foil tape
- Black Foam Core Poster Board
- Hides, Plants, & Décor
- Coco Husk or Cypress bedding
- Water bowl
- Snake Hook (*optional*)
- UVB light & dome (*optional*)

\* Use a 75-watt CHE bulb for 20-gallon tanks, 100-watt for 40-gallon.

\* Thermostats are NOT optional.

\* Cover three sides with foam core poster board to retain heat and increase security.

\* A big water dish on or near the hot side will help increase humidity.

\* A two-zone thermostat is when you are using both an overhead heat source and an under-tank heat mat. A heat mat is only necessary if you struggle with keep proper temps on your cool side.

\* A mesh sack of moss is not necessary if you rehydrate your substrate once or twice a week by pouring a cup or 4 of water directly into it.
