

Ball Python Tank Set-Up Guide

GLASS TANK SHOPPING LIST

- Dome for heat bulb (ceramic base)
- Ceramic Heat Emitter (CHE) bulb
- Thermostat to regulate heat source(s)
- Digital Thermometer/Hygrometer
- Cage clips
- HVAC foil tape
- Black Foam Core Poster Board
- Hides, Plants, & Décor
- Coco Husk or Cypress bedding
- Water bowl
- Snake Hook (*optional*)
- T5 UVB light & fixture (*optional*)

* Use a 75-watt CHE bulb for 20-gallon tanks, 100-watt or 150-watt for 40-gallon tanks or larger.

* A two-zone thermostat is when you are using both an overhead heat source and an under-tank heat mat. A thermostat is **NOT OPTIONAL**.

* Cover the outside of three sides with foam core poster board to retain heat and increase security. (not shown)

* A heat mat is only necessary if you struggle with keep proper temps on your cool side.

* A mesh sack of moss is optional. Instead, rehydrate your substrate once or twice a week by pouring a cup or 4 of water directly into it.

* Only use low-wattage tropical or shade dweller UVB bulbs on a timer for 9-12 hours a day. 3-7% UVB Rating.
